Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders NioCorp Developments Ltd. Denver, Colorado

We have audited the accompanying consolidated balance sheets of NioCorp Developments Ltd. (the "Company") as of June 30, 2016 and 2015 and the related consolidated statements of operations and comprehensive loss, shareholders' equity, and cash flows for the years then ended June 30, 2016 and 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of NioCorp Developments Ltd. at June 30, 2016 and 2015, and the results of its operations and its cash flows for the years then ended June 30, 2016 and 2015, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As described in Note 4 to the consolidated financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 4. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

1. DESCRIPTION OF BUSINESS

NioCorp Developments Ltd. (the "Company") was incorporated on February 27, 1987 under the laws of the Province of British Columbia and currently operates in one reportable operating segment consisting of exploration and development of mineral deposits in North America, specifically, the Elk Creek Niobium/Scandium/Titanium property (the "Elk Creek Project") located in Southeastern Nebraska.

These consolidated financial statements have been prepared on a going concern basis that contemplates the realization of assets and discharge of liabilities at their carrying values in the normal course of business for the foreseeable future. These financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

The Company currently earns no operating revenues and will require additional capital in order to advance the Elk Creek Project. The Company's ability to continue as a going concern is uncertain and is dependent upon the generation of profits from mineral properties, obtaining additional financing and maintaining continued support from its shareholders and creditors.

2. BASIS OF PREPARATION

a) Basis of Preparation and

Consolidation These consolidated financial statements have been prepared in conformity with generally accepted accounting principles of the United States of America ("US GAAP"). Certain transactions include reference to Canadian dollars ("C\$") where applicable.

These consolidated financial statements include the accounts of the Company and the subsidiaries listed in the following table. All intercompany transactions and balances have been eliminated.

	Country of	Ownership at	June 30,
	incorporation	2016	2015
0896800 BC Ltd.	Canada	100%	100%
Elk Creek Resources Corp.	USA	100%	100%
Silver Mountain Mines Corp.	USA	100%	100%

b) Use of Estimates

The preparation of consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to the deferred income tax asset valuations and share-based compensation. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between estimates and the actual results, future results of operations will be affected.

3. SIGNIFICANT ACCOUNTING POLICIES

a) Exploration Stage Enterprise

The Company is in the exploration stage of operation and devotes substantially all of its efforts to acquiring and exploring mining interests that management believes should eventually provide sufficient net profits to sustain the Company's existence. Until such interests are engaged in commercial production, the Company

will continue to seek additional funding to support the completion of its exploration and development activities. The Company's activities are subject to significant risks and uncertainties, including its ability to secure sufficient funding to continue operations, to obtain proven and probable reserves, to comply with industry regulations and obtain permits necessary for development of the Elk Creek Project, as well as environmental risks and market conditions.

b) Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, cash in banks, investments in certificates of deposit with original maturities of 90 days or less, and money market funds.

c) Foreign Currency Translation

Functional and reporting currency

Items included in the financial statements of each of the Company's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The functional currency of the Company is the Canadian Dollar. Effective July 1, 2015, the Corporation changed the functional currency for Elk Creek Resources Corp., a wholly-owned subsidiary, from the Canadian Dollar to the U.S. Dollar. This change was made as a greater percentage of expenditures for technical and administrative services, and raised financings are denominated in U.S. Dollars. No other entities in the Group were affected by this change in functional currency. This change in judgment has been accounted for prospectively in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 830.

The reporting currency for these consolidated financial statements is U.S. Dollars.

Transactions in foreign currency

Transactions made in a currency other than Canadian Dollars are translated to the functional currency at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date and non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Foreign currency gains and losses arising from translation are included in profit or loss.

Translation to reporting currency

The results and financial position of entities that have a functional currency different from the reporting currency are translated into the reporting currency as follows:

- Assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of the reporting date.
- Income and expenses for each statement of income are translated at average exchange rates, unless
 this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the
 transaction dates, in which case income and expenses are translated at the rate on the dates of the
 transactions
- All resulting exchange differences are recognized in other comprehensive income.

d) Available for Sale Securities

Available for sale securities are recorded at fair value through the statement of operations pursuant to the fair value option permitted by ASC 825, Financial Instruments.

e) Equipment

Equipment is stated at cost less accumulated depreciation. The residual value, useful life and depreciation method are evaluated every reporting period and changes to the residual value, estimated useful life or depreciation method resulting from such review are accounted for prospectively. Depreciation is provided for using the straight line basis at the following rates per annum:

Computer equipment three years Furniture and equipment five years

f) Mineral Properties

Mineral property acquisition costs, including indirectly related acquisition costs, are capitalized when incurred. Acquisition costs include cash consideration and the fair market value of common shares issued as consideration. Properties acquired under option agreements, whereby payments are made at the sole discretion of the Company, are capitalized as mineral property acquisition costs at such time as the payments are made. Exploration costs are expensed as incurred. When it is determined that a mining deposit can be economically and legally extracted or produced based on established proven and probable reserves under SEC Industry Guide 7, development costs related to such reserves and incurred after such determination will be considered for capitalization. The establishment of proven and probable reserves is based on results of feasibility studies, which indicate whether a property is economically feasible. Upon commencement of commercial production, capitalized costs will be amortized over their estimated useful lives or units of production, whichever is a more reliable measure. Capitalized amounts relating to a property that is abandoned or otherwise considered uneconomic for the foreseeable future are written off.

g) Long Lived Assets

Long-lived assets held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. For purposes of evaluating the recoverability of long-lived assets, the recoverability test is performed using undiscounted net cash flows related to the long-lived assets. If such assets are considered to be impaired, the impairment recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

h) Financial Instruments

The Company's financial instruments consist of cash, receivables, available for sale securities, accounts payable and accrued liabilities, convertible debt and the related party loan. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from its financial instruments. The fair values of these instruments approximate their carrying value unless otherwise noted.

i) Concentration of Credit Risk

The financial instrument which potentially subjects the Company to credit risk is cash and cash equivalents, The Company holds invests or maintains available cash primarily in two commercial banks located in Vancouver, British Columbia and Santa Clara, California. As part of its cash management process, the Company regularly monitors the relative credit standing of these institutions.

j) Asset Retirement Obligation

The Company is subject to various government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities. The estimated costs associated with environmental remediation obligations are accrued in the period in which the liability is incurred if it is reasonably estimable or known. Until such time that a project life is established, the Company records the corresponding cost as an exploration stage expense, and has accrued \$85 related to estimated obligations as of June 30, 2016 (2015 - \$nil).

Future reclamation and environmental-related expenditures are difficult to estimate in many circumstances due to the early stage nature of the exploration project, the uncertainties associated with defining the nature and extent of environmental disturbance, the application of laws and regulations by regulatory authorities and changes in reclamation or remediation technology. The Company periodically reviews accrued liabilities for such reclamation and remediation costs as evidence indicating that the liabilities have potentially changed becomes available. Changes in estimates are reflected in the consolidated statement of operations in the period an estimate is revised.

k) Income Taxes

Income taxes are provided based upon the liability method of accounting pursuant to ASC 740-10-25, "*Income Taxes – Recognition*". Under the approach, deferred income taxes are recorded to reflect the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year-end. A valuation allowance is recorded against deferred tax assets if management does not believe the Company has met the "more likely than not" standard imposed by ASC 740-10-25-5 to allow recognition of such an asset.

1) Basic and Diluted Per Share Disclosure

Basic earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding. In computing diluted earnings per share, the weighted average number of shares outstanding is adjusted to reflect the effect of potentially dilutive securities. Potentially dilutive shares, such as stock options and warrants, are excluded from the calculation when their inclusion would be anti-dilutive, such as when the exercise price of the instrument exceeds the fair market value of the Company's common stock and when a net loss is reported. The dilutive effect of convertible debt securities is reflected in the diluted earnings (loss) per share calculation using the if-converted method. Conversion of the debt securities is not assumed for purposes of calculating diluted earnings (loss) per share if the effect is anti-dilutive.

m) Stock Based Compensation

The Company grants stock options to directors, officers, and employees. Option terms and vesting conditions are at the discretion of the Board of Directors. The option exercise price is equal to the closing market price on the Toronto Stock Exchange on the Toronto Stock Exchange on the day preceding the date of grant.

The Company estimates the fair value of stock options using the Black-Scholes option pricing model. The Company estimates forfeitures of stock-based awards based on historical data and periodically adjusts the forfeiture rate. The adjustment of the forfeiture rate is recorded as a cumulative adjustment in the period the forfeiture estimate is changed.

n) Recent Accounting Standards

From time to time, new accounting pronouncements are issued by the FASB that are adopted by the Company as of the specified effective date. Unless otherwise discussed, management believes that the impact of recently issued standards did not or will not have a material impact on the Company's consolidated financial statements upon adoption.

In February 2016, the FASB issued *Accounting Standard Update* ("ASU") 2016-02, *Leases*. The standard requires that a lessee recognize on the balance sheet assets and liabilities for leases with lease terms of more than 12 months. The recognition, measurement, and presentation of expenses and cash flows arising from a lease have not significantly changed from the previous GAAP. The standard is effective for fiscal years beginning after December 15, 2018, including interim periods within such fiscal year, with early adoption permitted. The Company is currently assessing the impact, if any, of implementing this guidance on its consolidated financial position, results of operations and liquidity.

In November 2015, the FASB issued ASU 2015-17 which simplifies income tax accounting. The update requires that all deferred tax assets and liabilities be classified as noncurrent on the balance sheet instead of separating deferred taxes into current and noncurrent amounts. This update is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, and early adoption is permitted. The Company elected to early adopt this standard as of July 1, 2014.

In April 2015, the FASB issued ASU 2015-03, Interest – Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. This update simplifies the presentation of debt issuance costs by requiring debt issuance costs to be presented as a deduction from the corresponding debt liability. The update is effective in fiscal years, including interim periods, beginning after December 15, 2015, and early adoption is permitted. The Company elected to early adopt this standard effective July 1, 2014.

In November 2014, the FASB issued ASU 2014-16, Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity. The ASU clarifies how current guidance should be interpreted in evaluating the economic characteristics and risks of a host contract in a hybrid financial instrument that is issued in the form of a share. Specifically, the amendments clarify that an entity should consider all relevant terms and features, including the embedded derivative feature being evaluated for bifurcation, in evaluating the nature of a host contract. The ASU is effective for fiscal years and interim periods beginning after December 15, 2015. The Company is currently assessing the impact, if any, of implementing this guidance on its consolidated financial position, results of operations and liquidity.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements – Going Concern. The new standard requires management of public and private companies to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern and, if so, disclose that fact. Management will also be required to evaluate and disclose whether its plans alleviate that doubt. The new standard is effective for annual periods ending after December 15, 2016, and interim periods within annual periods beginning after December 15, 2016. Adoption of the new guidance is not expected to have a material impact on the financial statement presentation of the Company.

4. GOING CONCERN ISSUES

The Company incurred a loss of \$11,408 for the year ended June 30, 2016 (2015 - \$23,115), and has an accumulated deficit of \$60,222 as of June 30, 2016. These factors indicate the existence of a material uncertainty that raises substantial doubt about the Company's ability to continue as a going concern.

The Company's ability to continue operations and fund its expenditures is dependent on Management's ability to secure additional financing. Management is actively pursuing such additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

These consolidated financial statements do not give effect to any adjustments required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements.

5. MINERAL INTERESTS

During the year ended June 30, 2011, the Company completed the acquisition of the Elk Creek property through a share exchange agreement with 0859404 BC Ltd, a Canadian company, which owned all the issued and outstanding shares of Elk Creek Resources Corp. ("Elk Creek"). The Company issued 18,990,539 common shares to acquire all of the issued and outstanding shares of 0859404 BC Ltd. and issued 1,034,348 common shares as a finder's fee with respect to the acquisition. The transaction did not meet the definition of a business acquisition, as set forth in ASC 805, and therefore was accounted for as a purchase of assets. The acquisition price was based

on the market value of the Company's common shares on the closing date and total consideration given was C\$13,246, including associated deferred tax impacts, of C\$4,736.

The property interests of Elk Creek consist of a number of prepaid five-year mineral exploration lease agreements, and include a pre-determined buyout for permanent ownership of the mineral rights. Terms of the agreements require no further significant payments until the conclusion of the prepaid lease, at which time the Company may negotiate lease extensions or elect to buyout the mineral rights. Certain agreements also contain provisions to purchase surface rights, and several contain provisions whereby the landowners would retain a 2% NSR. During the year ended June 30, 2015, the Company executed 5-year extensions to all landholder agreements covering 100% of the mineralized materials at the Elk Creek Project.

6. FLOW THROUGH LIABILITIES

The Company issued 8,337,000 common shares to Canadian investors on a flow-through basis for gross proceeds of C\$2,501 in November 2010. The Company was required to incur eligible flow-through expenditures up to November 2011. The Company was short by approximately C\$1,470 in meeting this requirement. Under the subscription agreement with the Canadian investors, the Company has an obligation to indemnify the subscriber for any taxes that may arise from the Company failing to meet the flow-through expenditure requirements. The Company did not receive any claims through April 30, 2016 against this accrual, and the accrual was reversed on April 30, 2016 and the Company recorded a corresponding gain of \$587 in 'other gains'. All claims after May 1, 2016 will be evaluated through the statute of limitations of the Canada Revenue Agency and expensed as incurred.

7. CONVERTIBLE DEBT

	As of Ju	une 30,
	2016	2015
Convertible Notes	\$ 475	\$ -
Convertible Security	5,991	-
	\$ 6,466	\$ -

Convertible Notes

The Company completed a non-brokered private placement of unsecured convertible promissory notes (the "Notes"), for gross proceeds of \$800 (the "Private Placement") in October 2015. The Notes bear interest at a rate of 8%, payable quarterly in arrears, are non-transferable and have a term of three years from the date of issue. Principal under the Notes is convertible by lenders at any time into, and payable by the Company in, common shares of the Company at a conversion price of C\$0.97 per common share, calculated on conversion or repayment using the then-current Bank of Canada noon exchange rate. Accrued but unpaid interest on the Notes will be convertible by lender into, and payable by the Company in, common shares at a price per common share equal to the most recent closing price of the Company's common shares prior to the delivery to the Company of a request to convert interest, or the due date of interest, as applicable, calculated using the then-current Bank of Canada noon exchange rate. Interest, when due, is payable either in cash or Shares, at the election of the Company.

The conversion feature of the debentures meets the definition of a derivative liability instrument because the conversion feature is denominated in a currency other than the Company's Canadian dollar functional currency and the conversion rate is variable and therefore does not meet the "fixed-for-fixed" criteria outlined in ASC 815-40-15. As a result, the conversion feature of the debentures is required to be recorded as a derivative liability recorded at fair value and marked-to-market each period with the changes in fair value each period being charged or credited to income.

The following table discloses the components associated with this transaction on the closing date:

	Convertib	ole Notes
Face value of Notes on closing	\$	800
Less:		
Transaction costs		(47)
Conversion component		(360)
Convertible notes, opening balance	\$	393

The Company incurred transaction costs of \$47, which have been added to the carrying amount of the financial liability and are amortized as part of the effective interest rate.

Changes in the Notes balance are comprised of the following:

	Conver	tible Notes

Change in fair value of derivative liability		(30)
Balance, June 30, 2016	\$	330

Lind Partners Convertible Security Funding

On December 22, 2015, the Company closed a definitive convertible security funding agreement (the "Lind Agreement") with Lind Asset Management IV, LLC ("Lind"). The Lind Agreement is comprised of a \$4,500 principal amount, 10% secured convertible security (the "Convertible Security") and 3,125,000 transferable common share purchase warrants (the "Lind Warrants"). The Convertible Security has a term of two years from its date of issuance, and interest is prepaid and added to its principal amount; accordingly, the initial face value of the Convertible Security is \$5,400, and the yield of the Convertible Security (if held, unconverted, to maturity) will be 10% per annum, or \$900. Each Lind Warrant will entitle the holder to purchase one additional common share (a "Lind Warrant Share") at a price of C\$0.72 on or before December 22, 2018. Lind can increase the funding under the Convertible Security by an additional \$1,000 during its two-year term. Further, provided certain conditions are met, the Company will have the right to call an additional \$1,000 under the funding agreement.

The Convertible Security is convertible into common shares of the Company at a conversion price equal to 85% of the volume weighted average trading price of the common shares (in Canadian dollars) for the five consecutive trading days immediately prior to the date on which the Investor provides the Company with notice of its intention to convert an amount of the Convertible Security from time to time. The issuance of the Convertible Security and the Lind Warrants was completed on a non-brokered private placement basis.

The Company has elected to account for the Convertible Security at fair value. Transaction costs of \$214, including a 3% closing fee paid to Lind \$135, were expensed at closing. In addition, the Company recognized \$620 in change in financial instrument fair value in the consolidated statement of operations related to fair value of the Lind Warrants at closing. The fair value of the Lind Warrants was estimated based on the Black Scholes pricing model using a risk free interest rate of 1.30%, an expected dividend yield of 0%, a volatility of 86.58%, and an expected life of 3.0 years.

Changes in the Convertible Security balance are comprised of the following:

	Convertibl	e Security
Opening balance	\$	4,500
Conversions		(638)
Change in fair market value		2,129
Balance, June 30, 2016	\$	5,991

The Convertible Security contains financial and non-financial covenants customary for a facility of this size and nature, and includes a financial covenant defining an event of default as all present and future liabilities of the Company or any of its subsidiaries, exclusive of related party loans, for an amount or amounts exceeding \$2,000, and which have not been satisfied on time or within 90 days of invoice, or have become prematurely payable as a result of its default or breach. This covenant became effective after February 1, 2016 and the Company was in compliance as of June 30, 2016.

8. COMMON STOCK

a) Issuances

2016 Issuances

On January 19, 2016, the Company closed a private placement and issued 9,074,835 units (each a "Unit") at a price of C\$0.57 per Unit, resulting in total gross proceeds of \$3,750. Each Unit consisted of one common share of the Company and one transferable common share purchase warrant (a "Private Placement Warrant"). Each Private Placement Warrant is exercisable to acquire one additional common share of the Company for a period of three years at a price of C\$0.75 per common share. In addition, the Company issued 75,450 broker warrants at closing, under the same terms as a Private Placement Warrant. The fair value of the broker warrants of \$15 was estimated based on the Black-Scholes pricing model using a risk free interest rate of 0.75%, an expected dividend yield of 0%, a volatility of 100.13%, and an expected life of 3.0 years.

2015 Issuances

In February 2015 the Company announced it had closed a partially brokered and partially non-brokered private placement of 2,914,000 special warrants ("2015 Warrants") at an issue price of C\$0.75 to raise aggregate gross proceeds of \$1,722. Each 2015 Warrant is exchangeable at any time after the closing date of the offering into one unit of the Company; each unit consists of one common share of the Company and one common share purchase warrant. Each warrant entitles the holder to acquire one additional common share at a price of C\$1.00 per share until February 27, 2017. The Company filed a prospectus and obtained the required receipt for that prospectus on March 23, 2015 and qualified the distribution of 2,914,000 2015 Warrants which were deemed exercised on March 30, 2015.

The agent, Mackie Research Capital Corporation ("MRCC") received a cash commission equal to 6.5% of the gross proceeds of the brokered portion of the offering being \$112 and 182,910 compensation warrants. The broker warrants are exercisable into common shares at a price C\$0.85 per share until February 27, 2017. The fair value of the agent warrants of \$79 was estimated based on the Black-Scholes pricing model using a risk free interest rate of 1.25%, an expected dividend yield of 0%, a volatility of 100.95%, and an expected life of 2.0 years. Total cash issue costs including agents' commission, legal and filing fees were \$230.

In November 2014 the Company announced it had closed a partially brokered and partially non-brokered private placement of 19,245,813 special warrants ("2014 Special Warrants") at an issue price of C\$0.55 to raise aggregate gross proceeds of \$8,846. Each 2014 Special Warrant is exchangeable at any time after the closing date of the offering into one unit of the Company; each unit consists of one common share of the

Company and one common share purchase warrant. Each warrant entitles the holder to acquire one additional common share at a price of C\$0.65 per share until November 10, 2016. The Company filed a prospectus and obtained the required receipt for that prospectus on January 14, 2015 and qualified the distribution of 19,245,813 2014 Special Warrants which were deemed exercised on January 19, 2015.

The agent, MRCC received a cash commission equal to 6.5% of the gross proceeds of the brokered portion of the offering and 205,304 non-transferable compensation units. The broker warrants are exercisable into units having the same terms as the units issued under the Offering. Each unit entitles the agent to purchase a unit at a price of C\$0.55 each. Each unit consists of one common share and one warrant exercisable at a price of C\$0.65 per share until November 10, 2016. The fair value of the agent warrants of \$108 was estimated based on the Black Scholes pricing model using a risk free interest rate of 1.25%, an expected dividend yield of 0%, a volatility of 108.9%, and an expected life of 2.0 years. Total cash issue costs including agents' commission, legal and filing fees was \$300.

b) Stock Options

The Company has a rolling stock option plan (the "Plan") whereby the Company may grant stock options to executive officers and directors, employees, and consultants at an exercise price to be determined by the board of directors, provided the exercise price is not lower than the market value on the date of grant. The Plan provides for the issuance of up to 10% of the Company's issued common shares as at the date of grant with each stock option having a maximum term of five years. The board of directors has the exclusive power over the granting of options and their vesting provisions.

Stock option transactions are summarized as follows:

		Weighted
	Number of	Average Exercise
	Options	Price (C\$)
Balance, July 1, 2014	7,060,000	\$ 0.19
Granted	7,320,000	0.76
Exercised	(6,250,000)	0.20
Cancelled/expired	(25,000)	0.30
Balance, June 30, 2015	8,105,000	0.69
Granted	5,875,000	0.62
Exercised	(1,415,000)	0.38
Cancelled/expired	(1,100,000)	0.75
Balance June 30, 2016	11,465,000	\$ 0.69
Number of options currently exercisable	5,765,000	\$ 0.75

The following table summarizes the information and assumptions used to determine option costs:

	Y	Year ended June 30,		
		2016 201		
Fair value per option granted during the period (C\$)	\$	0.30	\$	0.42
Risk-free interest rate		0.75%		1.25%
Expected dividend yield		0%		0%
Expected stock price volatility (historical basis)		98.2%		105.6%
Expected option life in years		2.15		2.15

The following table summarizes information about stock options outstanding at June 30, 2016:

			Aggregate		Aggregate
Exercise		Number	Intrinsic Value	Number	Intrinsic Value
price (C\$)	Expiry date	outstanding	(C\$000s)	exercisable	(C\$000s)
\$ 0.50	May 9, 2017	370,000	133	370,000	133
\$ 0.62	January 19, 2021	5,575,000	1,338	-	-
\$ 0.65	May 20, 2017	50,000	11	50,000	11
\$ 0.65	July 28, 2017	1,250,000	263	1,250,000	263
	September 2,				
\$ 0.76	2017	500,000	50	500,000	50
	December 22,				
\$ 0.80	2017	3,220,000	193	3,220,000	193
\$ 0.94	April 28, 2018	500,000	-	375,000	-
Balance Jun	ne 30, 2016	11,465,000	\$ 1,988	5,765,000	\$ 650

The aggregate intrinsic value in the preceding table represents the total intrinsic value, based on the Company's closing stock price of C\$0.86 as of June 30, 2016, which would have been received by the option holders had all option holders exercised their options as of that date. The total number of in-the-money options vested and exercisable as of June 30, 2016 was 5,390,000. The total intrinsic value of options exercised during the year ended June 30, 2016 was \$322.

As of June 30, 2016, there was \$328 of unrecognized compensation cost related to unvested share-based compensation arrangements granted under the Plan. The cost is expected to be recognized over a weighted average period of approximately one year.

c) Warrants

Warrant transactions are summarized as follows:

	Weighted avera				
	Warrants	exercise price (C\$)			
Balance, July 1, 2014	1,064,140	\$ 0.25

Exercised	(12,549,309)	0.65			
Expired	(7,068,500)	0.67			
Balance June 30, 2016	21,918,142	\$ 0.75			

- * Pursuant to a financial services advisory agreement with Mackie Research Capital Corporation ("MRCC") the Company issued 500,000 advisory warrants on December 4, 2014 and 250,000 advisory warrants on January 14, 2015. Each advisory warrant entitled MRCC to purchase a unit of the Company at a price of C\$0.55 each, on or before December 4, 2016. Each such unit consisted of one Common Share and one warrant exercisable at a price of C\$0.65 per share until December 4, 2016. These units were exercised during the year ended June 30, 2016, resulting in the granting of these additional 750,000 warrants.
 - ** Pursuant to a sponsorship agreement between MRCC and the Company in connection with the Company's graduation to the Toronto Stock Exchange, the Company issued 250,000 sponsorship warrants on January 14, 2015, entitling MRCC to purchase units of the Company at C\$0.60 per unit until January 14, 2017. Each such unit consisted of one Common Share and one warrant exercisable at C\$0.65 per share until January 14, 2017. These units were exercised during the year ended June 30, 2016, resulting in the granting of these additional 250,000 warrants.
 - ***The Company entered into an offtake agreement with ThyssenKrupp Metallurgical Products GmbH ("ThyssenKrupp") whereby ThyssenKrupp will purchase 50% of future ferroniobium production up to 3,750 metric tons from the Elk Creek property for an initial term of ten years from commencement of commercial production which may be extended by mutual agreement of the parties. The Agreement presupposes the Company obtaining project financing, obtaining all necessary approvals and constructing a mine at Elk Creek. Pursuant to the agreement, the Company granted ThyssenKrupp a non-transferable warrant to acquire 8,569,000 common shares of the Company at an exercise price of C\$0.67 per common share, which expired on December 12, 2015.

At June 30, 2016 the Company has outstanding exercisable warrants, as follows:

Number	Exercise Price (C\$)	Expiry Date
6,745,947 \$	0.65	November 10, 2016
182,910	0.85	February 27, 2017
2,714,000	1.00	February 27, 2017
3,125,000	0.72	December 22, 2018
9,150,285	0.75	January 19, 2019
21,918,142		

On April 20, 2016, the Company announced an early warrant exercise program (the "Program") designed to encourage the early exercise of (unlisted) share purchase warrants exercisable at C\$0.65 that otherwise expire on November 10, 2016 (the "November 2016 Warrants"). The Program and its commencement were approved at a Special Meeting of Shareholders held on Tuesday May 17, 2016.

The warrant exercise program closed on June 17, 2016, resulting in gross proceeds of C\$4,807. A total of 7,394,822 C\$0.65 share purchase warrants expiring November 10, 2016 were exercised during the incentive period, representing about 47.6% of all C\$0.65 Warrants outstanding and 66% of warrant holders eligible to participate. Each holder who exercised one warrant during the program received 1.11029 Common Shares, representing one warrant share and 0.11029 of a Common Share, as the incentive portion. A total of 8,210,394 common shares were issued under the program, which was previously approved by our shareholders on May 17, 2016. The Company recognized a warrant expense of \$535 in other operating expenses in the consolidated statement of operations related to the fair market value of the incentive shares issued.

9. RELATED PARTY TRANSACTIONS AND BALANCES

On June 17, 2015, the Company entered into a one-year loan in the amount of \$1,500 with Mark A. Smith, Chief Executive Officer and Executive Chairman of NioCorp. The one-year term loan bears an interest rate of 10%, is secured by the Company's assets pursuant to a concurrently executed general security agreement, and is subject to both a 2.5% establishment fee and 2.5% prepayment fee.

On July 1, 2015, the Company entered into a non-revolving credit facility agreement (collectively, with the loan above, the "Smith Loans") in the amount of \$2,000 with Mark Smith and completed a drawdown of \$500 on that day, and an additional \$100 was drawn under the credit facility on December 2, 2015. The credit facility bears an interest rate of 10%, is secured by the Company's assets pursuant to a general security agreement, and is subject to both a 2.5% establishment fee and 2.5% prepayment fee.

With the receipt of additional funding proceeds from the December Private Placement and Convertible Security, on January 13, 2016, the Company repaid \$1,100 of the outstanding Smith Loans, representing 100% of amounts drawn down under the credit facility, plus \$500 of the amount due under the one-year loan. Interest and establishment fees payable as of December 31, 2015 were also paid. As of June 30, 2016 accounts payable and accrued liabilities included interest payable to Mr. Smith of \$53.

Effective June 16 2016, the Company and Mr. Smith agreed to extend the due date for the remaining loan amount of \$1,000 until June 16, 2017.

10. EXPLORATION EXPENDITURES

	For the year			
	ended June 30,			
	2016	2015		
Feasibility study and engineering	\$ 2,671 \$	5,892		
Field management and other	940	1,791		
Drilling	197	4,976		
Metallurgical	844	4,506		
Geologists and field staff	 67	886		
Total	\$ 4,719 \$	18,051		

Additions to exploration and evaluation assets during the year ended June 30, 2016 related to ongoing engineering and metallurgical costs incurred in connection with a feasibility study, as well as land-related payments and general project management costs.

11. INCOME TAXES

Domestic and foreign components of loss before income taxes for the years ended June 30, 2016 and 2015 are as follows:

	For the	e year
	ended J	une 30,
	2016	2015
Canada	\$ 4,542	\$ 7,365
United States	6,866	18,505
Total	\$ 11,408	\$ 25,870

Major components of income tax benefit for the year ended June 30, 2016 and 2015 are as follows:

	For the ye ended June	
	2016	2015
Current taxes	\$ - \$	-
Deferred taxes:		
Canada	-	-
United States	-	(2,755)
Total deferred tax benefit	-	(2,755)
Total income tax benefit	\$ - \$	(2,755)

The following table is a reconciliation of income taxes at statutory rates with the reported taxes:

	F en				
		2016		2015	
Loss before income taxes	\$	11,408	\$	25,870	
Combined federal and provincial statutory income tax rate		26%		26%	
Income tax recovery at statutory tax rates		2,966		6,726	
Foreign rate differential		893		2,405	
Warrant expense		(399)		-	
Share based compensation		(270)		(651)	
Change in estimates related to prior years		(635)		-	
Change in valuation allowance		(2,169)		(5,725)	
Other		(386)		-	
Income tax benefit	\$		\$	2,755	

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company's net deferred tax asset balances as of June 30, 2016 and 2015 have been revised to reflect the appropriate jurisdictional tax rate applied to Canadian temporary differences. On a consolidated basis, there was no impact on the Company's income tax provision for the years ended June 30, 2016 and 2015 and the net deferred tax balance as of June 30, 2016 and 2015 has not changed due to a full valuation allowance, however, the net deferred tax assets before valuation allowance as of June 30, 2016 and 2015 decreased by \$1,783 and \$1,996, respectively. The significant components of deferred taxes are as follows:

	As of Ju	30,	
	2016		2015
Deferred tax assets			
Mineral interest	\$ 6,555	\$	4,963
Net operating losses available for future periods	3,951		3,312
Other	144		206
Total deferred tax assets	10,650		8,481
Valuation allowance	(10,650)		(8,481)
Net deferred tax assets	\$ 	\$	_

The Company establishes a valuation allowance against future income tax assets if, based on available information, it is more likely than not that all of the assets will not be realized. The valuation allowance of \$10,650 at June 30, 2016 relates mainly to net operating loss carryforwards in Canada and mineral interest due to deferred exploration expenditures in the United States, where the utilization of such attributes is not more likely than not. During the year ended June 30, 2015, the Company recognized \$2,755 of deferred tax benefit which was generated during the year to offset existing deferred tax liabilities associated with the acquisition of the Elk Creek mineral interest.

The Company had cumulative net operating losses of \$13,625 as of June 30, 2016 (2015 - \$12,453) for federal income tax purposes and these carryforwards will expire between 2017 and 2035.

The Company had no unrecognized tax benefits as of June 30, 2016 or 2015. The Company recognizes interest accrued related to unrecognized tax benefits and penalties in its income tax provision. The Company has not recognized any interest or penalties in the fiscal years presented in these financial statements. The Company is subject to income tax in the U.S. federal jurisdiction and Canada. Certain years remain subject to examination but there are currently no ongoing exams in any taxing jurisdictions.

12. FAIR VALUE MEASUREMENTS

The Company measures the fair value of financial assets and liabilities based on US GAAP guidance which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

The Company classifies financial assets and liabilities as held-for-trading, available-for-sale, held-to-maturity, loans and receivables or other financial liabilities depending on their nature. Financial assets and financial liabilities are recognized at fair value on their initial recognition.

Financial assets and liabilities classified as held-for-trading are measured at fair value, with gains and losses recognized in net income. Financial assets classified as held-to-maturity, loans and receivables, and financial liabilities other than those classified as held-for-trading are measured at amortized cost, using the effective interest method of amortization. Financial assets classified as available-for-sale are measured at fair value, with unrealized gains and losses being recognized in income.

Financial instruments, including receivables, accounts payable and accrued liabilities, and related party loans are carried at amortized cost, which management believes approximates fair value due to the short term nature of these instruments.

The following table presents information about the assets and liabilities that are measured at fair value on a recurring basis as at June 30, 2016 and 2015, and indicates the fair value hierarchy of the valuation techniques the Company utilized to determine such fair value. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical instruments. Fair values determined by Level 2 inputs

utilize data points that are observable such as quoted prices, interest rates, and yield curves. Fair values determined by Level 3 inputs are unobservable data points for the financial instrument, and included situations where there is little, if any, market activity for the instrument:

As of June 30, 2016							
Total Level 1 Level 2							
\$	4,412	\$	4,412	\$	-	\$	-

The Company measures the fair market value of the Level 3 components using the Black-Scholes model and discounted cash flows, as appropriate. These models are prepared by a third party and take into account management's best estimate of the conversion price of the stock, an estimate of the expected time to conversion, an estimate of the stock's volatility, and the risk-free rate of return expected for an instrument with a term equal to the duration of the convertible debt.

The significant unobservable valuation inputs for the Convertible Debt includes an expected return of 51.06%. A 15% decrease (increase) in the expected return would result in an increase (decrease) to fair value of \$94, or approximately 2%.

The derivative liability was valued using a Black-Scholes pricing model with the following inputs:

Risk-free interest rate	1.25%
Expected dividend yield	0%
Expected stock price volatility	88.63%
Expected option life in years	2.50

The following table sets forth a reconciliation of changes in the fair value of the Company's convertible debt components classified as Level 3 in the fair value hierarchy:

	As of June 30,					
	 2016	2015				
Beginning balance	\$ - \$	-				
Convertible securities closings	4,860	-				
Conversions to equity	(638)	-				
Realized and unrealized losses	 2,099	_				
Ending balance	\$ 6,321 \$	-				

13. COMMITMENTS AND CONTINGENCIES

Other Exploration Properties

The Company held an option to acquire a 100% interest in certain claim units located in the Kenora Mining Division, Ontario, referred to as the Tait Lake property, and had previously written the exploration asset down to \$nil. In April 2015, the Company sold the Tait Lake option for a cash payment of \$9.

The Company, through its wholly-owned subsidiary, Northeast Minerals, held exploration rights for the Jungle Well and Laverton projects in Australia (the "Exploration Rights"). On July 2, 2015, the Company entered into an agreement to sell its investment in Northeast Minerals to a third party. Assets of Northeast Minerals included the Explorations Rights, with a nil book value, and 3,750,000 shares of Victory Mines Limited ("Victory"), an Australian public entity. The book value of the Victory shares was written down to one dollar at June 30, 2015 to reflect the estimated market value. No other gain or loss was incurred related to the sale of Northeast Minerals.

NioCorp has the following land, office, facility and equipment lease commitments in place as of June 30, 2016:

		Payments due by period							
		Le	Less than 1-3 4-5						After 5
